Jio Business

IP Centrex

Fully IP based Cloud PBX service with Fixed Mobile Convergence

IP Centrex solution from Jio is a service where the functionalities of a PBX are simulated on the cloud. It offers a highly scalable and cost-effective Enterprise voice communication solution for your business.

With Jio's IP Centrex you get HD voice calling over fixed line network for on-net calling. You can have your own private numbering plan (Intercom dialing) within your office centrex user group, completely free of charge. It can also facilitate Fixed Mobile Convergence (FMC) for integrated connectivity between fixed and wireless telecommunication networks. Our service gives you freedom from worries of technology obsolescence since we take care of all technology upgrades at no additional cost.

Benefits

Convenience
Short digit dialing (Intercom) to communicate within office

Maintain privacy
Publish landline number and receive calls on mobile

Affordable
No need to buy separate PBX for calling service
