

JioCloud

Cost Advisory

**Unlock 40% Cloud Savings – With Intelligence,
Not by Guesswork**

JioCloud Cost Advisory offers AI-powered insights to eliminate waste, automate rightsizing, and boost ROI.

The Challenge

- **Cloud bills you didn't see coming**
Unpredictable cloud bills with hidden costs and idle resources quietly driving budgets over the line.
- **Too much manual work, too little time**
Manually optimising spend across hundreds of workloads and services takes time - and often, it's time your teams don't have.
- **Insights that don't lead to action**
Most tools only tell you what you spent. Few show you how to spend better - and even fewer help you act on it.

The JioCloud Solution

Your always-on finops partner — powered by AI

JioCloud cost advisory analyses your cloud usage in real-time, identifies waste, and recommends optimisations. From unused compute to oversized storage, you get a clear view of where costs can be cut, how much you will save, and how to implement it.

Whether you're working with a few workloads or managing complex, multi-cloud environments, JioCloud cost advisory keeps your cloud lean, cost-effective, and aligned with your business priorities.

Key Features

- **AI-powered cost analysis**

Get machine learning insights that spot waste and forecast usage before they escalate.

- **Idle resource detection**

Find and fix cloud Idle Resources - unused VMs, Volumes, or IPs that quietly drain budgets.

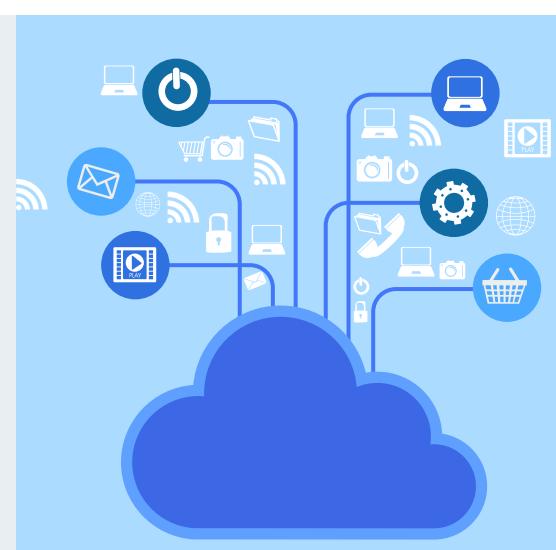

- **Smart instance rightsizing**

Match resource sizing to actual workloads - so you're never overpaying for what you don't need.

What You Gain

- Reduce cloud spend by up to 40%**
Find and eliminate waste across your stack - and see real, measurable savings.
- Save 80% of optimisation time**
No more spreadsheets or manual audits - implement recommendations in minutes, not weeks.
- Get continuous cost control**
Set rules once and let AI monitor usage, detect drift, and flag new savings as they emerge.
- Improve ROI on cloud investments**
Ensure every rupee you spend is used efficiently - with full visibility into what's working.
- Move faster, decide smarter**
See potential savings, impact, and implementation status at a glance - with workflows that match your organisational structure.

Use Cases in Action

Auto-detect idle resources

A staging environment was left running over the weekend. JioCloud flags it, estimates the loss, and gives you a one-click fix.

Rightsize without guessing

Your dev VMs are oversized. Cost advisory shows usage stats and recommends downsizing - saving money without affecting performance.

Governance made simple

CFOs and finance teams get clear, audit-ready reports. Engineers see where to act. Everyone stays aligned.

Top Applications

Perfect for enterprises looking to keep their cloud lean and predictable:

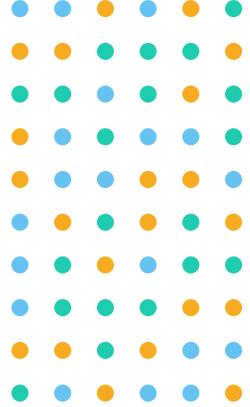

- Digital-first businesses*
- Financial services and insurance*
- E-commerce and marketplace*
- Technology and saas providers*
- Telecom and cloud-native infrastructure*

Who It's For

- FinOps practitioners:** Manage and control cloud budgets with real-time insights.
- Cloud architects** - Design lean, optimised infrastructure from day one.
- DevOps and infra teams** - Reduce manual work with automated optimisation.
- CFOs and finance teams** - Get clarity, control, and ROI tracking on every cloud rupee.

Why JioCloud

- Smarter savings with AI** - Proprietary machine learning adds intelligence on top of native cloud provider recommendations – for deeper insights and more savings.
- Built for enterprise governance** - Includes audit trails, approval workflows, and role-based access controls - ready for enterprise-scale needs.
- Deep ecosystem integration** - Connects with your CI/CD, monitoring tools, and cloud dashboards for seamless insight-to-action.
- Backed by JioCloud experts** - Get hands-on support and guidance from India's leading cloud provider – with unmatched local presence.
